DETAILED ACTION

*,

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “sliding the first and second grippers” and the array being moved by “rotating the first and second grippers” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 2, 12, 13, 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 recites the limitation "...so that conveyed packets become stacked together..." and also recites "...so that the first and second gripping members mechanically move independently of each other...". No structure is providing in the claim that will allow for these functions. Using phrase "so that" without any supporting structure to allow for the claimed recitations render the claim unclear. How does the first and second gripping members mechanically move independently of each other? How does the conveyed packets become stacked together? Similarly, Claim 2 recites the limitation "...so that the first and second gripping members mechanically move independently of each other...".

Claims 12 & 13 recite the limitations "moved by rotating the first and second grippers" and "moved by sliding the first and second grippers", respectively. In these apparatus claims no structure is provided that will allow for these functions. How are the first and second grippers rotated or slid?

Claim 19 recites the limitation "the first and second gripping members". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Rogovein et al. USP 5,425,565. Rogovein discloses a similar device comprising a(n):

- Stacking conveyor
- First and second gripping members (92, 102)
- First and second drive motors (83, 94) or means for automatically gripping the first and second gripping members
- The gripping forces are changeable

5. Claims 1, 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Koehler et al. USP 6,182,814. Koehler discloses a similar device comprising a(n):

- Stacking conveyor
- First and second gripping members (70, 80)
- First and second endless belts (77, 87)

Allowable Subject Matter

6. Claim 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Claims 4, 20-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

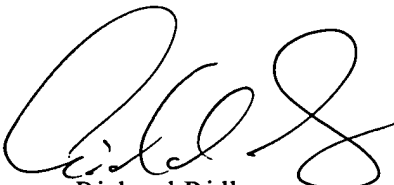

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
